

Accelerator

Product No. 7983

Ingredients: Each capsule contains - (-) Hydroxycitric Acid stabilized 500 mg., Chromium Polynicotinate 100 mcg., Bioperine® 2.5 mg.

Size: 90

Accelerator contains (-) hydroxycitrate, an organic compound obtained from the dried rind of the Brindall berry fruit of the plant, *Garcinia Cambogia*, which is native to India. This chemically unique compound has been studied extensively for its effects on appetite regulation, metabolizing carbohydrates and total body lipids. Double blind studies indicate those who took HCA three times per day lost an average of 11.1 pounds per person over the other group that only lost 4.2 pounds per person.

Because Accelerator inhibits the metabolic enzyme in the body, which is responsible for conversion of carbohydrate into fat, it thereby reduces fat and cholesterol production and increases the formation of additional glycogen. HCA has a reduced involvement with the central nervous system and therefore, does not have the typical appetite suppressant side effects of nervousness or insomnia. Chromium Polynicotinate is a form of chromium that has proven to be easily absorbed and retained in the body. The average American has been found to be chromium deficient. Chromium, in clinical studies, has been found to aid in the enhancement of insulin controlling blood sugar and cholesterol levels for prolonged energy production and it aids in the metabolization of proteins into muscle.

Accelerator is nature's bioavailability enhancing Thermonutrient™. Bioperine® enhances the body's natural thermogenic activity - hence the term Thermonutrient™. This enhancement may be explained as a means of increasing thermal energy sufficient to "power up" mechanisms related to thermogenesis. This in turn, results in increased metabolic processes that create "demand" for "supply" of a broad range of nutrients that contribute to metabolism, i.e. vitamins, minerals, herbals, amino acids, etc.

The benefits of Accelerator with a proper diet and exercise program:

- Decreases sugar cravings
- Decreases appetite
- Increases energy
- Inhibits loss of lean muscle mass
- Overcomes insulin resistance
- Prevents carbohydrate and protein conversion to fat

90 Capsules

SUPPLEMENT FACTS		
Serving Size: 1 Capsule		
Amount per serving		% DV
Chromium (from polynicotinate)	100 mcg.	83 %
Garcinia Cambogia (fruit)	500 mg.	*
(-)-Hydroxycitric acid 250 mg. from 500 mg. standardized Garcinia Cambogia		
BIOPERINE®	2.5 mg.	*
Other ingredients: Magnesium stearate, silicon dioxide. * Daily Value not established		

Contains no common allergens
